

CRITERIA FOR THE FINAL ASSESSMENT OF THE KNOWLEDGE OF STUDENTS OF THE 2ND YEAR OF THE FACULTY OF PHARMACY ON THE EXAM IN THE DISCIPLINE "ORGANIC CHEMISTRY"

The student is allowed to take the exam: – in the absence of unprocessed missed laboratory classes;

The final grade is given based on the calculation according to the formula: $0,1 \cdot \text{Isr.} + 0,9 \cdot \text{E}$ (where, **Isr.** is the average arithmetic score for 6 final classes; **E** is the score received for a written answer on the exam) according to Table 1.

Table 1. Scale of conversion of points calculated according to the formula into the final grade

Points calculated by the formula	Final assessment
1,0-1,9	1
2,0-2,9	2
3,0-3,9	3
4,0-4,9	4
5,0-5,9	5
6,0-6,9	6
7,0-7,9	7
8,0-8,9	8
9,0-9,9	9
10,0	10*

The structure of the examination ticket and the evaluation of individual tasks

№	Type of task	Number of points per task	Number of tasks	Maximum number of points
1	Written assignment	5	12	60
2	Comprehensive written assignment	10	1	10
3	Theoretical question No. 1	10	1	10
4	Theoretical question No. 2	20	1	20
total			15	100

The student gives a written answer to all questions. The exam task completion time is 60 minutes.

The student may receive bonus points for other activities of the student (Table 2).

Table 2. Bonus points for various types of student activities

Activity type	Number of bonus points
attending 1 meeting of the student scientific section	0,1
presentation at a meeting of a student scientific circle or a student scientific conference:	
– abstract report	0,4
– report based on own experimental data	0,8
prize-winning place at the student scientific conference:	
– 1 st place	1,0
– 2 nd place	0,7
– 3 rd place	0,5
production of a visual aid, table or stand	0,5
prize-winning place at the subject Olympiad, exhibition	
– 1 st place	1,0
– 2 nd place	0,7
– 3 rd place	0,5

Bonus points for all types of activities are summed up. When performing a work in co-authorship, bonus points are divided by the number of authors. If a student has bonus points, the final score is set as the

sum of the score calculated according to the formula and bonus points for various activities (according to Table 1).

Criteria are confirmed
at the meeting of the Department
№ 8 on 18.12.2023

Head of the Department of Bioorganic Chemistry
