

Topics of practical classes on the subject  
**"Maxillofacial surgery and outpatient surgery  
of the maxillofacial region"** for the 4th year of the Speciality "Dentistry" for the  
7th semester of the 2025-2026 academic year

**Classes at the polyclinic:**

1. Inflammatory diseases of the salivary glands .
2. Dystrophic diseases of the salivary glands .
3. Salivary stone disease .
4. Arthropathies and arthritis of the temporomandibular joint. Pain syndrome of dysfunction, internal disorders of the temporomandibular joint .
5. Arthrosis and ankylosis of the temporomandibular joint .
6. Extra-articular lesions of the temporomandibular joint. Dislocations of the lower jaw .
7. Neuralgia and neuropathy of the trigeminal nerve .
8. Pain syndromes of the face .
9. Neuropathies of the facial nerve .
10. Routes of infection spread in odontogenic inflammatory processes of the maxillofacial region .
11. Abscesses and phlegmons of the zygomatic, infraorbital and buccal regions
12. Abscesses and phlegmons of the temporal region, pterygopalatine fossa, temporopterygoid (infratemporal) space .
13. Abscesses and phlegmons of the orbital region .
14. Abscesses and phlegmons of the submandibular, mental, submental, parotid-masticatory regions .

**Classes at the hospital:**

15. Abscesses and phlegmons of the pterygomandibular space, retromandibular region, tongue .
16. Abscesses and phlegmons of the retropharyngeal and peripharyngeal spaces .
17. Phlegmon of the floor of the oral cavity. Putrefactive-necrotic phlegmon of the face and neck .
18. Principles of treatment of inflammatory diseases of the maxillofacial region .

Head of Department

D.A. Hrychaniuk

Topics of practical classes on the subject  
**"Maxillofacial surgery and outpatient surgery  
of the maxillofacial region"** for the 5th year of the Speciality "Dentistry" for the  
9th semester of the 2025-2026 academic year

**Classes in 1 shift (8.00-13.25)**

**Classes at the hospital (cycle No. 1 "Fundamentals of restorative and reconstructive surgery of the maxillofacial region"):**

1. Planning of restorative surgeries in the maxillofacial area. Indications and contraindications for plastic reconstructive and aesthetic surgeries.
2. Free grafting of cartilage and bone in maxillofacial surgery .
3. Surgical methods of treatment of anomalies and deformations of the lower jaw .
4. Surgical methods of treatment of anomalies and deformations of the midface .

**Classes at the hospital (cycle No. 2):**

5. Odontogenic tumors of the jaws .
6. Osteogenic tumors of the jaws .
7. Non-osteogenic tumors of the jaws .
8. Tumors of the salivary glands .

**N.N. Alexandrov Republican Scientific and Practical Center for  
Oncology and Radiology (oncology course):**

9. Malignant tumors of the skin. Metastasis of malignant tumors of the maxillofacial region .
10. Malignant tumors of the oral mucosa and lips .
11. Malignant tumors of the facial bones .
12. Principles of treatment of malignant tumors of the maxillofacial region. Operations on the lymphatic apparatus .

**Classes at the polyclinic:**

13. Organization of oncological medical care in the Republic of Belarus. Examination of patients with neoplasms of the maxillofacial region and neck .
14. Medical examination of patients with neoplasms of the maxillofacial region. Dental care for patients with oncological diseases .
15. Precancerous diseases of the maxillofacial region .
16. Post-radiation osteonecrosis of the jaws (osteoradionecrosis). Bisphosphonate osteonecrosis of the jaws .

Head of Department

  
D.A. Hrychaniuk

Topics of practical classes in the discipline  
**"Maxillofacial surgery and outpatient surgery  
of the maxillofacial region"** for the 5th year of the Speciality "Dentistry" for the  
9th semester of the 2025-2026 academic year

**Classes in the 2nd shift (14.00-19.25)**

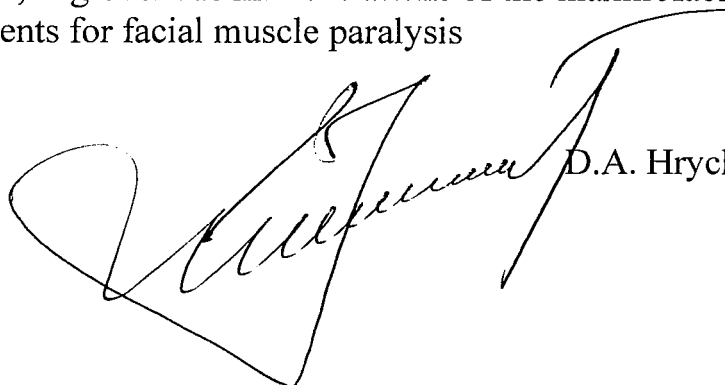

**Classes at the hospital:**

1. Odontogenic tumors of the jaws.
2. Osteogenic tumors of the jaws.
3. Non-osteogenic tumors of the jaws .
4. Tumors of the salivary glands .

**Classes at the polyclinic:**

5. Tooth-preserving operations
6. Bone pre-prosthetic surgeries
7. Dental implantation: types of dental implants, indications, contraindications, patient examination
8. Dental implantation: methods of implementation, complications
9. Organization of oncological medical care in the Republic of Belarus. Examination of patients with neoplasms of the maxillofacial region and neck.
10. Medical examination of patients with neoplasms of the maxillofacial region. Dental care for patients with oncological diseases.
11. Precancerous diseases of the maxillofacial region.
12. Post-radiation osteonecrosis of the jaws (osteoradionecrosis). Bisphosphonate osteonecrosis of the jaws.
13. Tumor-like diseases of the facial bones
14. Benign tumors and tumor-like diseases of soft tissue structures of the maxillofacial region and neck
15. Vascular tumors, angiovenous malformations of the maxillofacial region
16. Surgical treatments for facial muscle paralysis

Head of Department

D.A. Hrychaniuk

Topics of practical classes in the discipline  
**"Pediatric maxillofacial surgery"**  
for the 5th year of the Speciality "Dentistry" for the 9th semester of the 2025-2026  
academic year

1. Diseases of the temporomandibular joint in pediatric patients in pediatric patients. Trauma of facial bones, traumatic injuries of soft tissues and teeth in pediatric patients
2. Congenital malformations of the maxillofacial region in pediatric patients. Congenital anomalies of the frenulum of the lips and tongue. Shallow vestibule of the oral cavity. Anomalies of eruption and number of teeth
3. Benign neoplasms and tumor-like neoplasms of soft tissues of the maxillofacial region in pediatric patients. Benign osteogenic and non-osteogenic neoplasms and tumor-like formations of the bones of the facial skeleton
4. Odontogenic neoplasms of facial bones in pediatric patients. Odontogenic cysts of the jaws. Benign neoplasms and tumor-like formations of the salivary glands
5. Malignant neoplasms of the maxillofacial region and neck in pediatric patients
