

**PLAN OF CLASSES IN HISTOLOGY, CYTOLOGY AND EMBRYOLOGY  
FOR THE 3<sup>rd</sup> SEMESTER OF 2026/2027 ACADEMIC YEAR**

| <b>date</b> | <b>Week №</b> | <b>topic</b>                                                                         |
|-------------|---------------|--------------------------------------------------------------------------------------|
| 01-04.09    | 1             | Characteristic of the organs of digestive system.<br>Digestive system.               |
| 08-11.09    | 2             | Oral cavity and esophagus                                                            |
| 14-18.09    | 3             | Digestive system. Stomach. Intestine.                                                |
| 21-25.09    | 4             | Digestive glands: large salivary gland, liver, pancreas                              |
| 28.09-02.10 | 5             | Organs of haemopoiesis                                                               |
| 05-09.10    | 6             | Organs of endocrine system                                                           |
| 12-16.10    | 7             | <b>Intermediate control (theoretical part)</b>                                       |
| 19-23.10    | 8             | <b>Intermediate control (practical part - slides)</b>                                |
| 26-30.10    | 9             | Organs of peripheral and central nervous system                                      |
| 02-06.11    | 10            | Sense organs                                                                         |
| 09-13.11    | 11            | Organs of urinary system                                                             |
| 16-20.11    | 12            | Male reproductive system                                                             |
| 23-27.11    | 13            | Female reproductive system                                                           |
| 30.11-04.12 | 14            | 3-4 weeks of human embryogenesis. Organo- and histogenesis.                          |
| 07-11.12    | 15            | Extraembryonic organs: yolk sac, amnion allantois, chorion, placenta. Mammary gland. |
| 14-18.12    | 16            | <b>Intermediate control (theoretical part, practical part - slides).</b>             |
| 22-28.12    | 17            | <b>Diagnosis of slides</b>                                                           |

**Head of department of histology,  
Cytology and embryology**

**Studenikina T.M.**
