EXAM PRESCRIPTIONS
FOR 6th COURSE STUDENTS
for specialty 1-79 01 01 "General Medicine"
for the 2026-2027 academic year

1. Antibiotic from the group of azalides for the treatment of pneumonia.
2. Antibiotic from the group of tetracyclines for the treatment of infection caused by atypical intracellular microorganisms.
3. Antibiotic from the group of penicillins for the treatment of community-acquired pneumonia, administered orally.
4. Potassium channel blocker for the treatment of ventricular arrhythmias, as well as supraventricular tachyarrhythmias, with a pronounced ability to cumulate
5. Angiotensin II receptor blocker for the treatment of arterial hypertension.
6. A calcium channel blocker with antihypertensive and antiarrhythmic activity.
7. A blocker of H1-histamine receptors for the treatment of allergic dermatitis, which has a pronounced sedative activity.
8. H1-histamine receptor blocker for the treatment of allergic dermatitis, which does not possess sedative activity.
9. H2-histamine receptor blocker for the treatment of gastric and duodenal ulcers, which does not interact with the cytochrome P450 system.
10. Thiazide diuretic for the treatment of arterial hypertension.
11. A bronchodilator for the relief of an attack of bronchial asthma, inhibiting the activity of phosphodyl esterase.
12. NSAIDs from the group of selective COX-2 blockers.
13. A hypocholesterolemic drug that inhibits HMG-CoA reductase.
14. Glucocorticoid, administered by inhalation, for the treatment of bronchial asthma.
15. Medicine for the treatment of arterial hypertension during pregnancy.
16. Inhalation bronchodilator blocking M-cholinergic receptors for the treatment of COPD.
17. ACE inhibitor for the treatment of arterial hypertension, which is not a prodrug.
18. ACE inhibitor, which can be used to relieve hypertensive crisis.
19. Cardioselective β1-blocker long-acting for the treatment of arterial hypertension, modulating the release of NO.
20. Cardioselective β1-blocker for the treatment of arterial hypertension, which does not penetrate the blood-brain barrier.
21. Antifungal drug for gastrointestinal candidiasis.
22. Mucolytic agent, which is an antidote to paracetamol.
23. A drug for the treatment of arterial hypertension, which has an indiscriminate βadrenergic blocking and selective α-adrenergic blocking action.
24. Prokinetic for reflux esophagitis

25.Selective β2-adrenergic agonist used to relieve attacks of bronchial asthma.
26. Cardiac glycoside for the treatment of chronic heart failure.
27. A synthetic glucocorticoid for the treatment of rheumatoid arthritis, practically without mineralocorticoid activity.
28.Synthetic glucocorticoid used for drug anaphylactic shock.
29. Antiviral drug for the treatment of recurrent herpes infection
30. A medicinal product for the treatment of candidiasis from the group of triazoles.
31. A drug for the relief of a hypertensive crisis with intolerance to an ACE inhibitor for oral administration.
32. Selective agonist of imidazoline receptors.
33. Antibacterial drug for H. pylori eradication therapy.
34. A drug from the group of fluoroquinolones for the treatment of pneumonia.
35. Antiplatelet agent, inhibitor of ADP-dependent binding of fibrinogen to platelet receptors, prodrug.
36. Selectively blocking neurominidase antiviral drug for the treatment of influenza.
37. An indirect anticoagulant for the prevention of thromboembolic complications in a patient with atrial fibrillation.
38. Oral medication for the treatment of pseudomembranous colitis.
39. Aldosterone antagonist for a patient with chronic heart failure.
40. Mukoregulator for exacerbation of chronic bronchitis with difficult to separate sputum.
41. Thrombin inhibitor for the prevention of thromboembolic complications in a patient with atrial fibrillation.
42. A selective direct factor Xa inhibitor for patients with deep vein thrombosis of the lower extremities not associated with antiphospholipid syndrome.
43. Antiemetic agent used to prevent and relieve nausea and vomiting.
44. Broad-spectrum immunosuppressant that acts as a folic acid antimetabolite.
45. Antidepressant belonging to the selective serotonin reuptake inhibitor (SSRI) class.
46. Antiepileptic drug that blocks sodium (Na^+) channels.
47. Long-acting benzodiazepine for the treatment of anxiety disorders.
48. Non-benzodiazepine hypnotic agent for the short-term treatment of insomnia.
49. Phosphodiesterase type 5 (PDE5) inhibitor for treating a patient with pulmonary arterial hypertension.
50. Drug that inhibits uric acid synthesis.
51. Drug belonging to the bisphosphonate class.
