

Approved
at the staff meeting of
the Normal Physiology
Department 09.02.2024

Department of Normal Physiology
List of lectures for international students of the
General Medicine Faculty studying in English
2-nd Course
Academic year 2023/2024, spring term

Lecturer: Associate Professor T.G. Severina

№	Subject of the lecture	Dates			
		Batch 2 14.25-15.25 Aud. 107	Batch 3 11.30-12.30 Aud. 107	Batch 4 (group 6233EN) 11.40-12.40 Aud. 135	Batch 5 10.40-11.40 Aud. 109
1	Cardiac cycle. Methods of the heart investigation	22.02	23.02	21.02	19.02
2	Regulation of the heart function and circulation	29.02	01.03	28.02	26.02
3	Respiration. Lung ventilation	14.03	15.03	20.03	11.03
4	Gas exchange in the lungs and tissues. Transport of gases in blood	21.03	22.03	27.03	18.03
5	Regulation of respiration. Functional reserves of the hemocardiorespiratory system in gas exchange	28.03	29.03	03.04	25.03
6	Physiology of digestion. Digestion in the oral cavity and stomach	18.04	19.04	17.04	15.04
7	Digestion in the small and large intestine. The role of the pancreas and liver in digestion	25.04	26.04	24.04	22.04
8	Thermoregulation	02.05	03.05	08.05	29.04
9	Physiology of excretion	16.05	10.05	15.05	06.05
10	Innate and acquired forms of adaptive reactions of the human body to changing environmental conditions	23.05	24.05	29.05	20.05
11	Higher integrative functions of the brain as the physiological basis of human mental functions	30.05	31.05	05.06	27.05

Head of the Department
of Normal Physiology, professor

V.A. Pereverzev
