

### **Rating test control criteria.**

On the basis of the internal decision of the Pathological Anatomy department, the following rating test control criteria are established:

| Percentage of correct answers | Score on a 10-point scale |
|-------------------------------|---------------------------|
| Denial                        | 1                         |
| 0.01-0.35                     | 2                         |
| 0.36-0.45                     | 3                         |
| 0.46-0.55                     | 4                         |
| 0.56-0.65                     | 5                         |
| 0.66-0.75                     | 6                         |
| 0.76-0.85                     | 7                         |
| 0.86-0.95                     | 8                         |
| 0.96-1.0                      | 9                         |

Revised and approved at the Department meeting Pathological Anatomy (Protocol No. 1 of 31.08.2026).
