Approved Head of the Department of Clinical Pharmacology BSMU Associate professor, MD, PhD

I.S.Romanova «30» August 2023

## EXAM PRESCRIPTIONS FOR 6th COURSE STUDENTS for specialty 1-79 01 01 "General Medicine" for the 2023-2024 academic year

- 1. Antibiotic from the group of azalides for the treatment of pneumonia.
- 2. Antibiotic from the group of tetracyclines for the treatment of infection caused by atypical intracellular microorganisms.
- 3. Antibiotic from the group of penicillins for the treatment of community-acquired pneumonia, administered orally.
- 4. Potassium channel blocker for the treatment of ventricular arrhythmias, as well as supraventricular tachyarrhythmias, with a pronounced ability to cumulate
- 5. Angiotensin II receptor blocker for the treatment of arterial hypertension.
- 6. A calcium channel blocker with antihypertensive and antiarrhythmic activity. 7. A calcium channel blocker used for atrial arrhythmias.
- 8. A blocker of H1-histamine receptors for the treatment of allergic dermatitis, which has a pronounced sedative activity.
- 9. H1-histamine receptor blocker for the treatment of allergic dermatitis, which does not possess sedative activity.
- 10. H2-histamine receptor blocker for the treatment of gastric and duodenal ulcers, which does not interact with the cytochrome P450 system.
- 11. Thiazide diuretic for the treatment of arterial hypertension.
- 12. A bronchodilator for the relief of an attack of bronchial asthma, inhibiting the activity of phosphodyl esterase.
- 13. NSAIDs from the group of selective COX-2 blockers.
- 14. A hypocholesterolemic drug that inhibits HMG-CoA reductase.
- 15. Glucocorticoid, administered by inhalation, for the treatment of bronchial asthma.
- 16. Medicine for the treatment of arterial hypertension during pregnancy.
- 17. Inhalation bronchodilator blocking M-cholinergic receptors for the treatment of COPD.
- 18. ACE inhibitor for the treatment of arterial hypertension, which is not a prodrug.
- 19. ACE inhibitor, which can be used to relieve hypertensive crisis.
- 20. Cardioselective  $\beta$ 1-blocker long-acting for the treatment of arterial hypertension, modulating the release of NO.

- 21. Cardioselective  $\beta$ 1-blocker for the treatment of arterial hypertension, which does not penetrate the blood-brain barrier.
- 22. Antifungal drug for gastrointestinal candidiasis.
- 23. Mucolytic agent, which is an antidote to paracetamol.
- 24. A drug for the treatment of arterial hypertension, which has an indiscriminate  $\beta$  adrenergic blocking and selective  $\alpha$ -adrenergic blocking action.
- 25. Prokinetic for reflux esophagitis
- 26. Selective β2-adrenergic agonist used to relieve attacks of bronchial asthma.
- 27. Cardiac glycoside for the treatment of chronic heart failure.
- 28. A synthetic glucocorticoid for the treatment of rheumatoid arthritis, practically without mineralocorticoid activity.
- 29. Synthetic glucocorticoid used for drug anaphylactic shock.
- 30. Antiviral drug for the treatment of recurrent herpes infection
- 31. A medicinal product for the treatment of candidiasis from the group of imidazoles.
- 32. A drug for the relief of a hypertensive crisis with intolerance to an ACE inhibitor for oral administration.
- 33. Selective agonist of imidazoline receptors.
- 34. Laxative for chronic constipation.
- 35. A drug from the group of fluoroquinolones for the treatment of pneumonia.
- 36. Antiplatelet agent, inhibitor of ADP-dependent binding of fibrinogen to platelet receptors, prodrug.
- 37. Selectively blocking neurominidase antiviral drug for the treatment of influenza.
- 38. An indirect anticoagulant for the prevention of thromboembolic complications in a patient with atrial fibrillation.
- 39. Oral medication for the treatment of pseudomembranous colitis.
- 40. Aldosterone antagonist for a patient with chronic heart failure.
- 41. Antibacterial drug for H. pylori eradication therapy.
- 42. Mukoregulator for exacerbation of chronic bronchitis with difficult to separate sputum.
- 43. Thrombin inhibitor for the prevention of thromboembolic complications in a patient with atrial fibrillation.
