**PROGRAM**

**WORK EXPERIENCE PRACTICAL TRAINING MEDICAL  
OUTPATIENT PRACTICE IN THERAPEUTIC DENTISTRY**

**for the specialty:  
1-79 01 07 «Dentistry»**

The program of the work experience practical training is based on the educational standard of higher education in the specialty 1-79 01 07 «Dentistry» approved and enforced by the Resolution of the Ministry of Education of the Republic of Belarus of 26.01.2022 No. 14; and on the curriculum of the higher educational institution in the specialty 1-79 01 07 «Dentistry» approved by 19.05.2021, registration No L 79-1-7/2122/*mf*

### **COMPILERS:**

L.A.Kazeko, Head of the Conservative Dentistry Department, Educational institution «Belarusian State Medical University», Ph. D., associate professor;

L.A.Nikiforenkov, Associate professor of the Conservative Dentistry Department, Educational institution «Belarusian State Medical University», Ph. D., associate professor;

O.I.Abaimova, Associate professor of the Conservative Dentistry Department, Educational institution «Belarusian State Medical University», Ph. D., associate professor;

O.S.Gorodetska, Associate professor of the Conservative Dentistry Department, Educational institution «Belarusian State Medical University», Ph. D., associate professor.

### **RECOMMENDED FOR APPROVAL:**

By the Conservative Dentistry Department of the Educational Institution «Belarusian State Medical University»  
(protocol No. 11 of 21.04.2022);

By the Council of the Medical Faculty for International Student of Educational Institution «Belarusian State Medical University»  
(protocol No. 8 of 31.05.2022)

## EXPLANATORY NOTE

The purpose of work experience of medical outpatient department practice in therapeutic dentistry is to provide for students' mastering practical skills and competences and prepare them for independent professional activity in the field of the specialty dentistry.

The tasks of students' of medical outpatient department practice in therapeutic dentistry include:

acquiring professional skills in the specialty, consolidation, expansion and systematization of knowledge obtained during the study of academic discipline «Therapeutic dentistry».

gaining experience in public, organizational and educational work in the healthcare system.

Upon completion of work experience practical training medical outpatient department practice in therapeutic dentistry, the student must

**know:**

- the orders, the instructions regulating a sanitary and antiepidemic regimen in the healthcare institution;
- the role and tasks of the doctor for rendering the qualified and specialized medical care to the population;
- rules of filling in medical documents on polyclinic reception;
- methods of diagnostic and treatment of the basic dental diseases of a therapeutic profile;

**be able to:**

- to organize actions for providing a sanitary and antiepidemic regimen and safe working conditions consultation;
- to be competent and correct record of medical documents in polyclinic reception;
- to operate correctly with dental units in a medical office;
- to be competent and correct in fill in medical documentation of the dental patient;
- to carry out infiltration and conduction anesthesia in treatment of firm tissues of teeth disease of a pulp;
- to choose tools and to carry out professional hygiene of an oral cavity of patients;
- to make a preparation of carious cavities of I, II, V classes taking into account anatomo-physiological features of firm tissues of teeth and used restoration materials;
- to fill carious cavities of I, II, V classes, non-carious defects with light- and chemicalcuring composite material;
- to do finishing of restoration, and estimate quality of restoration;
- to form access to root canal;
- to determine the working length of the root canal by x-ray examination;
- to select tools and to carry out mechanical handling of the root canal by the «Step -back» and «Crown-down» methods;

– to perform lateral condensation sealing of root canal and to estimate quality of sealing.

**possess:**

– taking medical history and examination of the patient, index assessment of oral health condition (OHI-S, DMFT, Complex Periodontal Index (CPI; P.A.Leus, 1988));

– techniques of carrying out additional methods of diagnostic of caries, pulpitis, apical periodontitis;

– technique of individual treatment planning and prophylaxis;

– technique of filling in medical documentation of the dental patient and drawing up the individual plan of treatment and prophylaxis;

– techniques of carrying out professional oral hygiene;

– techniques of quality control of professional oral hygiene.

**In total**, to outpatient department practice in therapeutic dentistry allocate 108 academic hours during 2 weeks after the end of the 6th semester.

Of these, 72 are classroom hours, 36 hours of student independent work.

The current certification is carried out on the last day of practice in the form of a differential credit, for which the student submits a diary, a report of practice and a characteristic.

Students undergo industrial practice in the organizations of the Ministry of Health of the Republic of Belarus, which are the bases of the practice of university students (*hereinafter* - the organization of health care).

General and direct management of practice is carried out in health care organizations.

General management of industrial practice in healthcare organizations is carried out by the head of the healthcare organization or his deputy.

The direct management of industrial practice in a healthcare organization is carried out by an employee of the healthcare organization from among the most qualified specialists, appointed by order of the head of the organization.

General management of industrial practice is carried out by the head of the university practice, scientific and methodological guidance - by the head of industrial practice from the Department of Conservative Dentistry.

## **CONTENT OF PRACTICE**

Outpatient department practice in therapeutic dentistry is carried out in the positions of dentist assistant in the dental department (dental office) in the department of a healthcare institution.

During the period of practical training of nursing care and manipulation technique, students obey all the rules of the internal labor regulations of the basic healthcare institution.

A student is allowed to practical training of outpatient department practice in therapeutic dentistry and manipulation technique if he has a health certificate and after being instructed at the workplace on safe working conditions.

## **FORMS OF PRACTICAL TRAINING**

Outpatient department practice in therapeutic dentistry is carried out in the following forms:

1. Assistance in performing diagnostic and therapeutic procedures (R-diagnosics, anesthesia, preparation of carious cavities of II and IV classes according to Black, endodontic preparation, filling of root canals, etc.);
2. Providing a clinical examination of the patient;
3. Providing a treatment plan for the patient;
4. Providing restoration therapy and endodontic treatment;
5. Providing preventive measures to maintain the patient's dental health;
6. Maintaining medical records of a dental patient;
7. Providing sanitary and educational work (promotion of knowledge about a healthy lifestyle, ways and methods of maintaining dental health, prevention of dental diseases);
8. Studying the content of documents (orders, regulations and instructions) that regulate the sanitary and epidemiological regime in a medical and preventive institution;
9. Studying the basics of medical law in dentistry;
10. Organization of measures for the prevention of nosocomial infection, hepatitis, HIV infection and iatrogenic factors in dentistry;
11. Participation in medical conferences of health care institutions.

## **REGULATORY FRAMEWORK ACTIVITIES OF A HEALTHCARE INSTITUTION**

1. О здравоохранении: Закон Республики Беларусь от 18.06.1993 № 2435-XII : в ред. от 21.10.2016 № 433-3.
2. Об утверждении клинического протокола оказания скорой (неотложной) помощи взрослому населению: приказ Министерства здравоохранения Республики Беларусь от 30.09.2010 № 1030.
3. Об утверждении клинических протоколов «Экстренная медицинская помощь пациентам с анафилаксией», «Диагностика и лечение системной токсичности при применении местных анестетиков»: постановление Министерства здравоохранения от 01.06.2017 № 50.
4. Об утверждении клинического протокола стоматологического профиля: приказ Министерства здравоохранения Республики Беларусь от 26.12.2011 № 1245.
5. Об утверждении клинического протокола «Диагностика и лечение пациентов с заболеваниями челюстно-лицевой области»: постановление Министерства здравоохранения Республики Беларусь от 04.08.2017 № 80.
6. Об утверждении форм первичной медицинской документации в стоматологии: приказ Министерства здравоохранения Республики Беларусь от 14.01.2011 № 24.

7. О порядке ведения, заполнения, хранения первичной медицинской документации в стоматологической службе: письмо Министерства здравоохранения Республики Беларусь от 20.04.2011 № 02-3-13/738-63.

8. Об организации диспансерного наблюдения взрослого и детского населения у врача-стоматолога: приказ Министерства здравоохранения Республики Беларусь от 30.05.2011 № 558.

9. О мерах совершенствования работы по раннему выявлению онкологических заболеваний: приказ Министерства здравоохранения Республики Беларусь от 21.12.2010 № 1350.

10. Об утверждении Санитарных норм и правил «Санитарно-эпидемиологические требования к организациям, оказывающим медицинскую помощь, в том числе к организации и проведению санитарно-противоэпидемических мероприятий по профилактике инфекционных заболеваний в этих организациях», признании утратившими силу некоторых постановлений Министерства здравоохранения Республики Беларусь: постановление Министерства здравоохранения Республики Беларусь от 05.07.2017 № 73.

11. Об утверждении специфических санитарно-эпидемиологических требований к содержанию и эксплуатации организаций здравоохранения, иных организаций и индивидуальных предпринимателей, которые осуществляют медицинскую, фармацевтическую деятельность: постановление Совета Министров Республики Беларусь от 03.03.2020 № 130.

12. Об утверждении Инструкции о порядке организации оказания медицинской помощи лицам, инфицированным вирусом иммунодефицита человека: постановление Министерства здравоохранения Республики Беларусь от 08.11.2017 № 93.

13. Об утверждении Санитарных норм и правил «Требования к организации и проведению санитарно-противоэпидемических мероприятий, направленных на предупреждение возникновения и распространения вирусных гепатитов» и признании утратившим силу постановления Министерства здравоохранения Республики Беларусь от 14 ноября 2011 г. № 112 : постановление Министерства здравоохранения Республики Беларусь от 06.02.2013 № 11.

14. О проведении дезинфекции и стерилизации учреждениями здравоохранения: приказ Министерства здравоохранения Республики Беларусь от 25.11.2002 № 165.

15. О пересмотре ведомственных нормативных актов, регламентирующих вопросы по проблеме ВИЧ/СПИД: приказ Министерства здравоохранения Республики Беларусь от 16.12.1998 № 351.

16. Об утверждении Санитарных норм и правил «Санитарно-эпидемиологические требования к обращению с медицинскими отходами: постановление Министерства здравоохранения Республики Беларусь от 07.02.2018 № 14.

17. О проведении обязательных и внеочередных медицинских осмотров работающих: постановление Министерства здравоохранения Республики Беларусь от 29.07.2019 № 74.

18. О Правилах медицинской этики и деонтологии: постановление Министерства здравоохранения Республики Беларусь от 07.08.2018 № 64.

Согласно приложениям 1-4 к приказу Министерства здравоохранения Республики Беларусь от 14 января 2011 г. № 24 «Об утверждении форм первичной медицинской документации в стоматологии» первичные учетные медицинские документы заполняются по формам:

№ 037/у-10 «Листок ежедневного учета работы врача-стоматолога (фельдшера зубного)»;

№ 039/у-10 «Дневник учета работы врача-стоматолога (фельдшера зубного)»;

№ 039-СВ/у-10 «Сводная ведомость лечебно-профилактической работы»;

№ 039-З/у-10 «Сводные данные по стоматологическому здоровью пациентов при первичном обращении»;

№ 043/у-10 «Стоматологическая амбулаторная карта».

### **LIST OF PRACTICAL SKILLS TO BE CONSOLIDATED DURING PRACTICAL TRAINING AND THE LEVELS OF THEIR DEVELOPMENT**

Levels of mastering practical skills:

1 – know theoretically, professionally orientate, know the indications for conducting;

2 – know theoretically, evaluate, take part in the work of medical personnel;

3 – know theoretically, do it yourself.

A practical skill can be assigned several levels (for example: 1, 2, 3, or 1, 2). If there are no conditions in the healthcare organization for mastering the skill at levels 2, 3, the student must master practical skills, according to level 1.

№	Practical skills	Recommended	
		Number	Level of mastering practical skills
1	Carrying out sanitary and educational work (health bulletin and/or brochure (motivational album))	1	3
2	Interview and examination of the patient, index assessment of the oral cavity status	15	3

3	Filling out the medical documentation of a dental patient, drawing up individual plans for treatment and prevention measures	15	3
4	Patients motivation for the basics of professional oral hygiene	15	3
5	Carrying out professional oral hygiene	15	3
6	Performing infiltration and nerve block anesthesia	10	2, 3
7	Preparation of carious cavities of I, II, V classes and non-carious lesions	10	3
8	Filling of carious cavities of I, II, V classes and non-carious lesions	10	3
9	Carrying out individual stages of endodontic treatment of single-rooted teeth	5	2, 3
10	Determination the working length of the root canal	5	2, 3
11	Mechanical handling of the root canal by the «Step - back» and «Crown-down» methods	5	2, 3
12	Evaluation of the quality of restoration	10	3

### **THEMES AND FORMS OF SANITARY AND EDUCATIONAL WORK**

During the course of medical outpatient practice in therapeutic dentistry, the student must prepare a sanitary bulletin and / or brochure (motivational album) on the proposed sanitary and educational topics among dental patients.

Topics of sanitary-educational work:

1. Risk factors in development of dental caries.
2. Risk factors in development of periodontal diseases.
3. Methods and tools of caries prevention.
4. Methods and tools of periodontal diseases prevention.
5. Individual oral hygiene.
6. Professional oral hygiene.
7. Modern methods of treatment of dental caries.
8. Modern methods of treatment of periodontal diseases.
9. Modern methods of endodontic treatment of teeth.
10. Prevention of oncological diseases of the oral cavity.

## INFORMATIONAL AND METHODOLOGICAL PART

### CALENDAR AND THEME PLAN MEDICAL OUTPATIENT PRACTICE

Forms and types of work	Number		
	weeks/days	classroom hours	total
Carrying out sanitary and educational work (prepare a sanitary bulletin and / or brochure (motivational album))	daily	5	12
Taking medical history and examination of the patient, index assessment of oral health condition	daily	7	10
Filling out the medical documentation of the dental patient, drawing up individual plans for treatment and preventive measures	daily	5	7
Teaching patients the basics of individual oral hygiene (individual motivation)	daily	7	9
Carrying out professional oral hygiene	daily	15	17
Performing infiltration and nerve block anesthesia	daily	3	5
Preparation of carious cavities of I, II, V classes and non-carious lesions	daily	5	8
Filling of carious cavities of I, II, V classes and non-carious lesions	daily	8	11
Carrying out individual stages of endodontic treatment of single-rooted teeth	daily	6	10
Determination the working length of the root canal	daily	3	6
Mechanical handling of the root canal by the «Step -back» and «Crown-down» methods	daily	5	8
Evaluation of the quality of restoration	daily	3	5
<b>Total:</b>	2/10	72	108

## **REQUIREMENTS FOR CONTENT, DESIGN STUDENT'S INTERNSHIP REPORTING DOCUMENTATION**

During the practice, the student, under the supervision of the direct supervisor of the practice from the healthcare organization, completes the practice program and fills out the following documents:

- the diary of outpatient department practice (Appendix 1),
- the report of outpatient department practice (Appendix 2),
- the characteristic (Appendix 3).

The title page of the diary, the report is signed by the general head of practice from the healthcare institution, the head of practice from the department, approved by the head physician and certified by the seal of the healthcare institution. The characteristics are signed by the direct head of the practice from the healthcare institution, approved by the head physician and certified by the seal of the healthcare institution.

The diary is a document that records the implementation of the industrial practice program. In the diary, the student daily notes the mastered practical skills, their number and level of development.

Registration of the diary (name of the patient and his age, complaints with which the patient applied, the clinical picture of the disease (St. loc.), clinical examination data (with index examination methods (DMFT, OHI-S, CPI)), diagnosis of the disease according to the ICD Classification -10, treatment plan, treatment, dental education indicating the methods and means used to motivate and teach the patient's individual oral hygiene) is written in a neat, legible handwriting.

Every day, the diary is signed (with a transcript) by the immediate supervisor of the practice from the healthcare institution and the student. Corrections, additions after endorsement of the records by the direct supervisor of the practice are not allowed.

During the last week of internship, the student prepares a report on the internship. The report should contain a list of practical skills acquired during the work experience. The report indicates the total number of completed skills for the entire period of practice based on the diary. The report should indicate all mastered skill levels (for example: 1, 2, or 2, 3). The report is signed by the student.

The characteristic for a student is drawn up by the direct supervisor of the practice from the healthcare institution, approved by the head of the healthcare institution and certified by the seal of the healthcare institution. The description notes:

a) business qualities of a trainee student, his ability to acquire professional skills, master practical skills;

b) the presence and results of the development of personal qualities (communicative, moral, volitional) necessary for the profession;

c) compliance with labor discipline, labor protection requirements, sanitary norms and rules;

c) general assessment of the results of the implementation of the practice program and the level of practical training achieved;

d) relationships with the team, knowledge and implementation of the norms of

medical ethics and deontology.

Registration of a diary, report and other reporting documents of a student is carried out on paper in A4 format using the MS Word application.

### **QUESTIONS FOR PREPARATION TO DIFFERENTIATED CREDIT**

1. Preparation for sterilization and sterilization of dental instruments.
2. Diagnostic methods in therapeutic dentistry.
3. Plan of inspection of primary dental patient.
4. Dental outpatient department card. Registration and reporting dental documentation. Rules of filling in.
5. Index assessment of the dental status.
6. Professional oral hygiene. Carrying out stages.
7. Methods of indication of dental deposits. Hygienic indexes. Methods of excision of tooth deposits.
8. Risk factors of an inflammation of a gingiva.
9. Clinical features inflammation of gingiva. Diagnostic methods. Gingival index (GI, Loe-Silness), definition technique, interpreting.
10. Treatment-and-prophylactic actions for elimination of an inflammation of a gingiva.
11. Clinical signs of destructive processes in periodontium tissues.
12. The clinical diagnostic methods characterizing destructive processes in tissues of a periodontium. Complex Periodontal Index (CPI; P.A.Leus, 1988). Definition technique. Interpreting.
13. Dental caries. Development mechanism, epidemiology.
14. Definition of dental caries. Caries classifications: international (WHO,1997), Black classification etc.
15. Risk factors of dental caries. Caries resistance and caries susceptibility.
16. Modern concept of development of dental caries.
17. Enamel caries (white spot lesion). Clinic, diagnostic, differential diagnosis.
18. Enamel caries (superficial caries). Clinic, diagnostic, differential diagnosis.
19. Differential diagnosis of caries of enamel.
20. Enamel caries. Treatment.
21. Dentine caries. Clinic, diagnostic methods.
22. Differential diagnosis of caries of a dentine.
23. Dentine caries. Treatment methods.
24. Choice indications of sealing materials when sealing carious cavities of various localizations.
25. Prophylaxis of caries of teeth of adults.
26. Methods and anesthesia agents in a therapeutic dentistry.
27. Indications and contraindications to carrying out local anesthesia for therapeutic treatment.
28. Complications when carrying out local anesthesia. Prophylaxis of complications.

29. Low-invasive methods of treatment of dental caries. Indications and contraindications. Carrying out technique.
30. The main stages of work with adhesive systems.
31. Chemical-curing composite sealing materials. Indications and contraindications to application. Work technique.
32. Light-curing composite sealing materials. Indications and contraindications to application. Work technique.
33. Criteria of an assessment of quality of seals.
34. Pulpitis. Development mechanism. Classifications (ICD-10, Gofung).
35. Acute pulpitis. Clinic, diagnostic methods. Treatment.
36. Acute purulent pulpitis. Clinic, diagnostic, differential diagnosis. Treatment.
37. Chronic pulpitis. Clinic, diagnostic, differential diagnosis. Treatment.
38. Chronic hyperplastic pulpitis. Clinic, diagnostic, differential diagnosis. Treatment.
39. Chronic ulcerative pulpitis. Clinic, diagnostic, differential diagnosis. Treatment.
40. Pulp necrosis. Development mechanism. Clinic, diagnostic, differential diagnosis. Treatment.
41. Differential diagnosis of various forms of pulpitis.
42. Methods of treatment of pulpitis.
43. Pulpitis treatment under a local anesthesia. Indications. Contraindications. Treatment stages.
44. Pulpitis treatment with use of devitalizing agents. Indications. Contraindications. Treatment stages.
45. Apical periodontitis. Development mechanism. Classification (ICD-10; I.G.Lukomsky).
46. Acute apical periodontitis. Clinic, diagnostic methods. Acute management.
47. Chronic apical periodontitis. Clinic, diagnostic methods.
48. Rules of work with endodontic tools in clinic.
49. Agents for filling of root canals. Classification. Indications and contraindications. Application technique.
50. Assessment of quality of endodontic treatment.

## **METHODOLOGICAL INSTRUCTIONS FOR PRACTICE SUPERVISORS AND STUDENTS**

### **Heads of healthcare organizations:**

concludes agreements with the university on the organization of students' internships, issues an order to enroll students in internships in accordance with the agreements, to appoint general and direct supervisors of internships in the organization and send it to the university (an electronic version is allowed).

**General practice leader in healthcare organization:**

allocates students to the divisions of the healthcare organization;  
organize the briefing of students on labor protection, safety precautions and industrial sanitation;  
interacts with practice leaders from departments on the implementation of the practice program by students;  
involve students in the work provided for by the program of industrial practice;  
provide students with the necessary conditions for the implementation of the industrial practice program;  
control the labor discipline of students.

**Immediate supervisor in the health of the organization:**

together with the leader of the group draws up a schedule for the internship of students and submits it for approval to the head of the healthcare organization;  
distributes students to workplaces in accordance with the schedule of internships;  
conducts briefings on safety, industrial sanitation, fire safety in the healthcare organization and at the workplace;  
introduces students to the organization of work in the workplace; provides students with assistance in mastering practical skills, in consolidating theoretical knowledge, professional skills at each stage of industrial practice;  
identifies and timely eliminates shortcomings in the course of the production practice, and, if necessary, reports them to the head of the practice of the university and the management of the healthcare institution;  
at the end of the production practice, he makes a characteristic for the student.

**The department supervising the practical training:**

interacts with the general head of practice in the healthcare institution on the implementation of the practice program by students;  
provides scientific and methodological assistance to students during the period of internship;  
daily controls the labor discipline of students;  
organizes the process of preparation and acceptance of an objective structured differentiated credit.

**Group leader:**

participates in drawing up a schedule for passing practical lessons in the organization of health care, brings it to the attention of students;  
monitors the industrial discipline in the group, timely informs the heads of the practical training from the department about the violations by the students of the labor schedule of the healthcare organization;  
at the end of the practical training, he signs the students' reporting documentation (diary, report on industrial practice, characteristics) with the head of the health organization, certifying it with the seal of the organization.

**A student for an internship must:**

familiarize yourself with the program of industrial practice on the website;  
attend a course meeting on organizational and methodological issues,  
briefing on labor protection, safety precautions and industrial sanitation of production practice;

obey the internal regulations of the healthcare organization, observe the basics of deontology;

be instructed in labor protection, safety precautions, fire safety, industrial sanitation in a healthcare organization and comply with them;

to record the main points of their familiarization and practical activities in various departments of the healthcare institution, indicating during the performance of which procedures, diagnostic studies or other manipulations he was present, what he performed independently under the guidance of medical workers;

complete the program of industrial practice, draw up the documentation of the established sample (diary of industrial practice, report on industrial practice), receive a reference.

The report should reflect the professional qualities of the student-trainee as well as the ability to acquire professional skills. Indicate the presence and results of the development of personal qualities necessary for the profession. Give a general assessment of the results of the completion of the practical training program and the achieved level of practical training. Characterize the relationships with the team, knowledge and compliance with the norms of medical ethics and deontology. In conclusion, recommendations should be given on the eligibility of the student for the interim assessment in work experience practice, and proposals to University should be made as to the improvement of the quality of theoretical training preceding the student's referral to practice.
